

Easiest Car in the World to Own

Ford Falcon

THE NEW-SIZE FORD

Falcon Tudor in Raven Black

Ford Falcon ... so easy to drive ... so easy to own!

The New-size Ford is easy on the wallet, easy to park, easy to drive, easy to look at. It's sized to handle and park like a "small" car ... powered to pass and climb like a "big" car ... and built like *no* other car for savings!

Falcon gives you up to 30 mpg on regular gas. You save still *more* on oil, mufflers and parts. Built in Dearborn, Michigan,

automotive capital of the world, the Falcon can cruise American turnpikes easily and safely mile-after-mile-after-mile.

And the 6-passenger Falcon demonstrated its *durability* in Experience Run, U.S.A., a grueling test of stamina. But the best news about Falcon is this: its savings begin with its low, *low* price! You'll find it the easiest car in the world to own!

Sports-car agility ... with a big-car ride

Prepare for the biggest surprise of your automotive life the very *first* time you drive a Falcon. For here is a car that accomplishes the "impossible" — gives you the handling and agility of a sports car ... *and* the ride and comfort of a big car. The secret is in Falcon's suspension. By a special mounting of springs and shocks, impractical on heavier cars, the Falcon driver is made to feel like he is actually *part of the car!* Try it yourself!

Luxurious *Falcon* interiors

seat **6** comfortably

in a far smaller car!

The New-size Ford has roomy comfort for 6 big adult passengers as you can see below. By utilizing *functional* styling and *single-unit* body design, by shortening the hood and deck to reduce overhang, Falcon gives you a *full-size* passenger compartment. There's stretch-out room everywhere! And notice, too, the *beauty* of the Luxury Lounge interiors (right)! Above is standard interior; below optional.

World's most experienced new car

Ford Falcon ... so easy to drive ... so easy to own!

The New-size Ford is easy on the wallet, easy to park, easy to drive, easy to look at. It's sized to handle and park like a "small" car ... powered to pass and climb like a "big" car ... and built like *no* other car for savings!

Falcon gives you up to 30 mpg on regular gas. You save still more on oil, mufflers and parts. Built in Dearborn, Michigan,

automotive capital of the world, the Falcon can cruise American turnpikes easily and safely mile-after-mile-after-mile.

And the 6-passenger Falcon demonstrated its *durability* in Experience Run, U.S.A., a grueling test of stamina. But the best news about Falcon is this: its savings begin with its low, *low* price! You'll find it the easiest car in the world to own!

Up to 30 miles per gallon

Falcon's all-new V6 was designed specifically for this car. It thrives on regular gas, delivers up to 30 miles per gallon!

Engine is up front

To give better directional stability and greater safety, the Falcon engine is in front. This allows the gas tank to be mounted at the rear to lessen danger in event of collision. You'll find the Falcon beautifully balanced, easy to steer. And the big rear trunk has over 2 1/2 times the space of the best-selling import!

Foam seat padding

Driving on long trips you'll appreciate the foam seat padding that Falcon provides at no extra cost! It's far more comfortable.

Single-Unit body ... with Zincalad Coating

Falcon's Single-Unit Body gives you a quieter, safer, more solid body. Zincalad Coating of main underbody members resists rust and corrosion. You've never seen a body more quiet...more durable.

These features make *Falcon* your best buy!

Safety construction by FORD

Safety is first with Ford always. And because balance is vital to safety, Ford went to great lengths to see that the Falcon is a properly balanced car. With its front-mounted engine, the Falcon steers true, has fine stability and behaves beautifully on curves, while the Single-Unit body assures you safety in steel.

Short turning ... Easiest parking

It's easy to turn a Falcon because of its small turning diameter. Falcon turns in 38 feet, ordinary cars need 41 to 43 feet. Parking's a breeze!

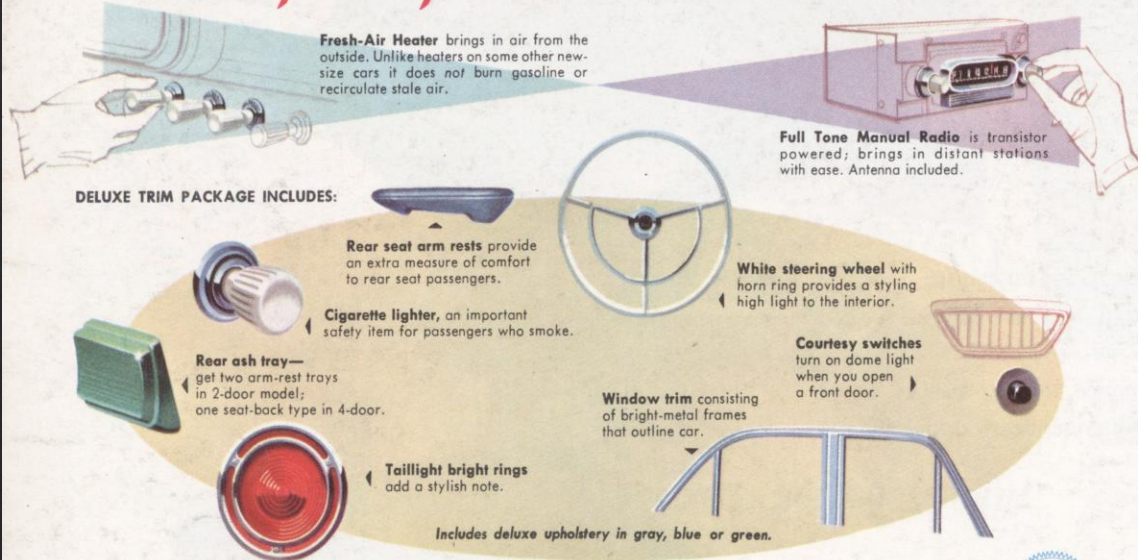

AUTOMATIC TRANSMISSION

Certainly you can have automatic drive in your new Falcon—and at surprisingly low cost, too. This new Zipped-Formatic was designed expressly for the Falcon, and it performs beautifully. If you should prefer conventional shifting, choose the durable 3-speed manual transmission.

PLUS Ford's exclusive Lifeguard Design that includes:
 1. Lifeguard dump-steer steering wheel with 3 evenly spaced spokes. 2. Lifeguard Double-Only door locks for added protection against door springing open upon impact. 3. Lifeguard seat belts, fully cushioned with super shock-absorbing material. 4. Lifeguard cushioning on instrument panel. 5. Seat belts to help keep you in your seat in case of impact. 6. Lifeguard air safety belts to keep "small fry" safe in the rear seat. 7. Lifeguard arm rests fully cushioned.

*Optional at modest extra cost

Genuine *Ford Falcon* Options and Accessories

SPECIFICATIONS

The new Ford Quality Audit system, a Ford first, results in products of highest quality. Quality Audit Teams select samples from each shift for an exhaustive search for any deviation from strict quality standards.

Falcon Design: All-new, welded, integral body and frame, with zinc-coated rocker panels and main underbody members for durability and quietness with high strength-weight ratio. Completely sealed and insulated. Clear-visibility safety glass throughout. Choice of 9 Single Color or Two Tone color combinations in gleaming, durable Diamond Lustre Finish.

Engine: 90-hp Falcon Six—144-cu. in. displ.; 3.50" bore x 2.50" stroke; 8.7 comp. ratio; regular fuel; 6-port intake manifold.
